SUMMARIES

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Sequence 1857, Application US/09938842A

Patent No. US20020160378A1

GENERAL INFORMATION:

APPLICANT: Harper, Joef

APPLICANT: Kreps, Joef

APPLICANT: Application STRESS-REGULATED GENES OF PLANTS, TRANSGENIC PLANTS CONTAINING

TITLE OF INVENTION: STRESS-REGULATED GENES OF PLANTS, TRANSGENIC PLANTS CONTAINING

TITLE OF INVENTION: STRESS-REGULATED GENES OF PLANTS, TRANSGENIC PLANTS

CURRENT ELING DATE: 2001-08-24

CURRENT APPLICATION NUMBER: US 60/227, 866

PRIOR FILING DATE: 2001-08-24

PRIOR FILING DATE: 2001-06-24

PRIOR FILING DATE: 2001-06-22

NUMBER OF SEQ ID NOS: 5379

SEQ ID NO 1857

LENGTH: 459

Publication No. US20030124517A1

GENERAL INFORMATION:

APPLICANT: PICHUNATES, Sergio

TITLE OF INVENTION: HEPATITIS A VIRUS NUCLEOTIDE SEQUENCES, RECOMBINANT

TITLE OF INVENTION: PROTEINS AND USES THEREOF

TITLE OF INVENTION: PROTEINS AND USES THEREOF

TITLE OF INVENTION: PROTEINS AND USES THEREOF

TITLE OF INVENTION: DOING 102 / 2301-17955

CURRENT APPLICATION NUMBER: US/10/272,459

CURRENT FILING DATE: 2002-10-15

SOFTWARE: Patentin Ver. 2.0

SOFTWARE: Patentin Ver. 2.0

SOFTWARE: DATE: DATE: SEQUENCE

TYPE: DA.

ORGANISM: Artificial Sequence
                                                                                                                                                                                                                                                                             155
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Description of Artificial Sequence: recombinant protein of 41 kDa
                                                                                                                                         144
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         161
